Beyond disposable

Experience, quality and design since 1994

Una storia di visione

Esperienza, qualità e design dal 1994

La nostra azienda nasce nel 1994, dalle perspicaci intuizioni di due giovani imprenditori pratesi che hanno riconosciuto nei primi scampoli di tessuto non tessuto proveniente dagli Stati Uniti le grandi potenzialità di quelli che sono divenuti col tempo prodotti utilizzati ormai da ognuno di noi nella vita quotidiana.

Inizialmente specializzati in articoli per la pulizia, siamo riusciti, con impegno costante e grande dedizione, ad ampliare le applicazioni del tessuto non tessuto, passando per il settore della bellezza e cura dei capelli, fino al comparto ho.re.ca. e al settore sanitario.

Oggi contiamo oltre 130 dipendenti, 8 unità produttive su circa 50.000 mq di superficie coperta e una rete vendita capillare su tutto il territorio nazionale, composta dai migliori grossisti del settore professionale.

L'incessante ricerca di innovazione, sia per quanto riguarda processi produttivi di ultima generazione, sia relativamente alla scelta di materie prime di eccellente qualità, accompagnata dal gusto del bello e dalla cura dei dettagli, contraddistingue da sempre la nostra mission aziendale.

Costantemente attenti alla soddisfazione del cliente, puntiamo a instaurare relazioni solide sia con i nostri partner che con i collaboratori e colleghi, per raggiungere assieme gli obiettivi con passione e fiducia reciproca.

Negli anni la nostra azienda è diventata la realtà di riferimento a livello nazionale nello scenario dei prodotti monouso in tessuto non tessuto, riuscendo a posizionarsi tra le prime in Europa e nel mondo, con esportazioni verso più di 70 Paesi.

Oltre 30 anni di
attività
Over 30 years of
business

Our company was founded in 1994 in Prato, from the clever intuitions of two young entrepreneurs who recognized in the first remnants of non-woven fabric from the United States the great potential of those that, over the time, have become products used by everybody in our daily lives. Initially specialized in cleaning items, we have succeeded, with constant commitment and great dedication, in expanding the applications of the nonwovens, passing through the beauty and hair care sectors, up to the ho.re.ca. and sanitary fields.

Today we have over 130 employees, 8 production sites on approximately 50,000 square meters of covered area and a widespread sales network throughout the country, made up of the best wholesalers in the professional sector.

The incessant search for innovation, both regarding the latest generation of production processes and the choice of excellent quality raw materials, accompanied by the taste for beauty and great attention to the details, has always distinguished our corporate mission.

Constantly attentive to customer satisfaction, we aim to establish solid relationships with both our partners, associates and colleagues, to achieve goals together with passion and mutual trust.

Over the years, our company has become the point of reference at a national level in the scenario of disposable non-woven products, managing to position itself among the first in Europe and in the world, with exportations to more than 70 countries.

SOSTENIBILITÀ

Il nostro impegno per il domani

I nostri impianti, alimentati dai pannelli fotovoltaici, vivono grazie al sole, trasformando la luce in energia pulita per creare ogni giorno prodotti che rispettano la terra. Le materie prime che scegliamo sono biodegradabili e per lo più compostabili, capaci di tornare alla natura senza lasciare tracce. Per noi sostenibilità non è una parola: è un impegno concreto, un gesto d'amore verso il pianeta, una scelta che guarda al futuro.

Our facilities, powered by photovoltaic panels, live thanks to the sun, turning its light into clean energy to create products that honor the earth every day. The raw materials we use are biodegradable and mostly compostable, able to return to nature without leaving a trace. For us, sustainability isn't just a word—it's a commitment, an act of love for the planet, a choice that looks to the future.

AIRLAID COLORATO

Linee pulite, colore protagonista

Materiale di derivazione naturale in cui le fibre di cellulosa sono fissate tenacemente da leganti vinilici e la cui resistenza alla trazione è superiore alla cellulosa tradizionale.

Il materiale si presenta alla vista liscio o goffrato, è morbido al tatto ed estremamente assorbente.

Generalmente nasce bianco e può essere stampato con un'ottima tenuta dei colori, dovuta al forte coefficiente di assorbenza del materiale stesso; può anche nascere già colorato in polpa.

Lo smaltimento corretto è nella raccolta differenziata carta

(si consiglia verifica con le Amministrazioni Locali).

Material made of natural cellulose fibres, that are bonded together with vinyl binders, with tensile strength much higher than traditional cellulose. It can be plain or embossed, very soft and extremely absorbent. Airlaid is usually white at the origin, and, because of its high level of absorbency, it can be printed producing beautiful and colour fastness results. The material can also be pulp-coloured.

Printed Airlaid

Patterns that dress the table with personality

AIRLAID DECORATO

Fantasie che vestono
la tavola con personalità

Materiale di derivazione naturale in cui le fibre di cellulosa sono fissate tenacemente tramite forti getti d'aria e la cui resistenza alla trazione è superiore alla cellulosa tradizionale. Il materiale si presenta alla vista liscio o goffrato, è morbido al tatto ed estremamente assorbente. Generalmente nasce bianco e può essere stampato con un'ottima tenuta dei colori, dovuta al forte coefficiente di assorbenza del materiale stesso; può anche nascere già colorato in polpa. Lo smaltimento corretto è nella raccolta differenziata carta (si consiglia verifica con le Amministrazioni Locali).

Material made of natural cellulose fibres, that are bonded together by strong air jets, with tensile strength much higher than traditional cellulose. It can be plain or embossed, very soft and extremely absorbent. Airlaid is usually white at the origin, and, because of its high level of absorbency, it can be printed producing beautiful and colour fastness results. The material can also be pulpcoloured.

Il mare non è solo acqua:
è respiro, memoria e futuro.

Proteggiamolo come
custodiamo i nostri sogni.

*The sea is more than just water:
it is breath, memory, and future.*

*Let's protect it as
we protect our dreams.*

Come il sole illumina la terra,
anche un semplice tovagliolo
può raccontare il rispetto per
ciò che ci circonda.

simple napkin can express respect for what

TESSUTO NON TESSUTO

NON-WOVEN

SPUNLACE

Materiale di derivazione mista, naturale e/o sintetica, le cui fibre sono fissate tra loro tramite intreccio, il che rende il tessuto estremamente resistente alla trazione e soffice. Si presenta generalmente liscio, è morbidissimo e drappeggia esattamente come una vera stoffa. Nasce bianco e può essere stampato con un fissaggio dei colori ad "effetto tessile". Lo smaltimento corretto è nella frazione secca della differenziata (si consiglia verifica con le Amministrazioni Locali). Tutti i decori stampati su tessuto non tessuto spunlace possono essere prodotti in versione Bio-compost, su richiesta, per un minimo di produzione che dipende dal decoro scelto.

Material that is a blend of natural and/or synthetic components. Its fibres are interlaced and gives it an extremely high tensile strength. It is very soft and looks, feels and drapes like real cloth. Spunlace is white at the origin and can be printed, with nice colour fastness and results very similar to printed fabrics. All the designs printed on non-woven tissue spunlace can be produced in Bio-compost version, on request, for a minimum order quantity that depends on the design chosen.

TESSUTO NON TESSUTO

NON-WOVEN / POLYPROPYLENE

POLIPROPILENE

Materiale 100% sintetico che nasce dalla lavorazione di un polimero plastico, il polipropilene, tramite una tecnica di produzione chiamata "spun bonded". Tale lavorazione rende le fibre resistentissime alla trazione. Si presenta sempre gofrato, nasce bianco o colorato in origine, ed ha una gamma colori sconfinata. Lo smaltimento corretto in caso di prodotto pulito può avvenire nella frazione dedicata alla plastica.

Material that is 100% synthetic and comes from a plastic polymer (polypropylene) that undergoes a production technology called "spun bonded". This process gives the fibres an extremely high tensile strength. The material is embossed and is produced white or in an unlimited range of colours.
